

Demo Guide & Access Reference

Use this guide to explore the Professional Project Dashboard demo environment. All accounts and project data are prepared for demonstration purposes only.

1. Demo Purpose

This dashboard demonstrates a role-based project monitoring portal with separate Project Manager, Admin, and Client experiences. The demo includes project overview, task tracking, timeline, schedule, report export, backup export, activity log, and client portal access.

2. Demo Accounts

Role	Email	Password	Access Scope
Project Manager	pm@professional-demo.local	DemoPM@2026	Full dashboard access
Admin	admin@professional-demo.local	DemoAdmin@2026	Operational monitoring access
Client Project 01	client-project-01@professional-demo.local	DemoClient01@2026	Client portal for Project 01
Client Project 02	client-project-02@professional-demo.local	DemoClient02@2026	Client portal for Project 02
Client Project 03	client-project-03@professional-demo.local	DemoClient03@2026	Client portal for Project 03
Client Project 04	client-project-04@professional-demo.local	DemoClient04@2026	Client portal for Project 04
Client Project 05	client-project-05@professional-demo.local	DemoClient05@2026	Client portal for Project 05
Client Project 06	client-project-06@professional-demo.local	DemoClient06@2026	Client portal for Project 06
Client Project 07	client-project-07@professional-demo.local	DemoClient07@2026	Client portal for Project 07
Client Project 08	client-project-08@professional-demo.local	DemoClient08@2026	Client portal for Project 08
Client Project 09	client-project-09@professional-demo.local	DemoClient09@2026	Client portal for Project 09
Client Project 10	client-project-10@professional-demo.local	DemoClient10@2026	Client portal for Project 10

Note: These credentials are for demo purposes only. Do not use them in any production environment or with real client data.

3. Recommended Demo Flow

1. Open the login page and download this Demo Guide from the top-right button.
2. Login as Project Manager and review the Command Center overview.
3. Open a project detail page to show progress, task tracker, timeline, documents, updates, and report center.
4. Open Schedule to show Online and Onsite agenda labels, including internal agenda visibility for internal roles.
5. Open Project Management to show client access, branding, project status, and lifecycle control.
6. Login as a Client account and confirm that only Beranda, Project, and Schedule are visible.
7. Confirm that Client users cannot see internal agenda, Activity Log, Backup Data, or Project Management.

4. Role Overview

Project Manager: Full access to Beranda, Notifikasi, Activity Log, Backup Data, Project, Schedule, and Kelola Project.

Admin: Operational monitoring access to Beranda, Notifikasi, Project, Schedule, and Kelola Project without PM-only audit and backup features.

Client / Guest: Read-only portal access to Beranda, Project, and Schedule for assigned projects only.

5. Demo Safety Notes

- Use dummy data only.
- Keep the demo Supabase project separate from the main project.
- Do not commit service role keys or private secrets.
- Use a separate Vercel project and GitHub repository for the demo version.
